

Model Deployment Phase:

Date	16 February 2026
Team ID	LTVIP2026TMIDS26163
Project Name	Explore with AI: Custom Itineraries for Your Next Journey
Maximum Marks	3 Marks

In this milestone, we are deploying the created model using streamlit. Model deployment using Streamlit involves creating a user-friendly web interface, enabling users to interact with the model through a browser. Streamlit provides easy-to-use tools for developing and deploying data-driven applications, allowing for seamless integration of models into web-based applications.

Give the project title:

- The main function to start the Streamlit application, allowing users to interact with the web app.
- `st.title("Travel Itinerary Generator")`
- Sets the title of the Streamlit app to "Travel Itinerary Generator." This title is prominently displayed at the top of the web page, providing users with a clear understanding of the app's purpose and functionality.

```
# Streamlit app
st.title("Travel Itinerary Generator")
```
